

NEW REVENUE BILL TO BE READY FOR HOUSE AUGUST 19

The new \$8,000,000,000 revenue bill will be ready for the consideration of the House when it reconvenes August 19, members of the Ways and Means Committee, drafting the measure, said today.

Intimations from the White House that the President is prepared to insist that 80 per cent of all profits growing directly out of the war be taken may necessitate rewriting the measure, and occasion some delay.

Under the scheme tentatively agreed upon, not more than 60 per cent of the aggregate war profits would be taken, and this proposition only from firms making more than 25 per cent on their invested capital. The committee doubts that flat 80 per cent levies can be made, and still leave American business in a healthy condition for meeting after-the-war competition.

A decision was reached in the committee yesterday to revise the scheme of automobile taxation tentatively agreed upon to take depreciation of old cars into account. Under the original plan any person buying a second-hand car would have been compelled to pay his tax based on the list price of the car when it was new.

The subcommittee on luxuries wrestled with the luxury tax problem yesterday. The entire matter was left open to further discussion this week, although some tentative agreements of a minor nature were reached in the committee.

U. S. TO REGULATE MEAT PRICES IN RETAIL MARKETS

The Food Administration is developing plans through which it is hoped a measure of regulation for the retail prices of meats may result, it was learned yesterday.

The agency through which it is proposed to act is the "fair price list," now published by committees in almost every section of the country. It is believed meats can be graded and cuts definitely standardized. Then, with the price at the packing plant fixed and known, it is thought publication of a fair retail price will eliminate exorbitant charges through pressure from the buyer.

Butchers will be asked to abide voluntarily by prices in the list. The problem is one of the most perplexing the administration has tackled, since there is no legislative provision for the control of retail prices and the quality and methods of marketing meat vary to such a great extent.

Our Government must have funds to "carry on." These funds can be safely drawn from two sources—increased production and increased savings. Buy one War Savings Stamp every week.

Adee Finishes 32 Years On Job

Second Assistant Secretary of State Alvaro A. Adee, though close to eighty years of age, yesterday received congratulations of Government officials from the President down on completing thirty-two years of service in his present post.

REACH AGREEMENT ON OIL QUESTION WITH MEXICANS

A tentative agreement whereby there will be no interruption of the oil supply from Mexico, has been reached between representatives of the oil companies and the Mexican government, the Department of State was advised yesterday. Immediate ratification of the agreement by the Mexican Congress is expected.

Several days ago the Mexican government agreed to postpone from August 1 to August 15 action on the decree which imposes a practically prohibitive tax on the exportation of oil, and at that time this action was taken as an indication that President Carranza would relent and not place such an obstacle in the war program of the United States.

However, neither of these agreements changes the Mexican government's position in regard to the ownership of the mineral resources of the country, which, according to the laws of Mexico, it is said, may be leased but not sold.

In the case of the oil interests the question of ownership of the mineral rights remains to be definitely settled, but this will require considerable time, and there is no uncertainty as to the ultimate outcome.

The temporary concessions which have been granted are attributed by officials to the putting into deeds of the words of President Wilson in his address to Mexican newspaper correspondents on June 17, which resulted in the lifting of the embargo on all essential supplies desired by Mexico.

Swift & Co.'s sales of fresh beef in Washington, D. C., for the week ending Saturday, July 27, averaged 13.2 cents per pound—Advt.
